

Student council meeting

Date 4-6-25

In today's meeting we looked at What we know about online safety.

We talked about how we stay safe online. The students said that we use passwords to stop others using their

account, guided access and not talking to people they don't know.

We then spoke about what we do when someone you don't know starts to talk to you. The students said that

they would talk to mum / dad or a teacher.

We asked why we use passwords and what is a strong password. They said that passwords stop people using their

account and that we can't use your name or date of birth as they aren't strong passwords.

Adults can make the password up for them.
